ADVANCED MATERIALS

A Global Advanced Materials Company

in production from 2027

2026 AGM Presentation

Andrew Worland, Managing Director and CEO - 23 November 2026

ASX:IG6 | FWB:H99

Important Information

This presentation has been prepared by International Graphite Limited (ASX:IG6, FWB:H99) (the Company) and contains summary information about the Company and its activities current as at the date of this presentation. It is for information purposes only and is not a prospectus, disclosure document or offer of securities, nor investment, financial or tax advice. It does not take into account any person's objectives, financial situation or needs. Investors should make their own enquiries and seek independent professional advice. No representation or warranty, express or implied, is made as to the accuracy or completeness of the information it contains.

This presentation contains forward-looking statements, including those relating to construction timing, production, funding, permitting, partnerships and market conditions. These involve known and unknown risks, uncertainties and assumptions, many outside the Company's control, that may cause actual results to differ materially. Readers should not place undue reliance on them, and the Company undertakes no obligation to update them except as required by law.

Production targets and 12-month operating snapshots for the Collie Micronising Facility and the Alkeemia / IG6 joint venture were first reported in ASX announcements dated 25 August 2026 and 17 June 2026; the Company confirms all material assumptions continue to apply. The earnings profile is derived from the Company's internal project models and is illustrative, not a forecast or guidance. The illustrative values apply third-party peer trading multiples; they are not a valuation of the Company or an indication of its future share price.

Springdale information is drawn from the Company's Scoping Study and JORC (2012) Mineral Resource estimate previously released to ASX. The Company confirms it is not aware of any new information or data that materially affects the information included in those announcements, that all material assumptions and technical parameters continue to apply, and that the form and context in which the Competent Person's findings are presented have not been materially modified. Amounts are in Australian dollars or euros as stated.

A Year of Growth and Achievement

MESSAGE FROM THE MANAGING DIRECTOR

2026 has been a fantastic year of growth and achievement for IG6.

- We started construction at Collie
- Formed our joint venture with Alkeemia at Porto Marghera
- Secured feedstock supply with Wogen
- Welcomed new strategic investors to our register.

It culminates in our rebranding to IG6 Advanced Materials, reflecting our evolution into **a global advanced materials company.**

Andrew Worland

Managing Director and CEO of IG6 Advanced Materials Limited

Building an Advanced Materials Platform in 2026

IG6 Advanced Materials is building a Western supply chain for high-spec industrial graphite, with one processing hub in construction in Australia and a second to follow in Europe.

The midstream process-first business model is one that **SGL Carbon**, **AMG Graphite**, **Asbury Advanced Materials** and **Superior Graphite**, amongst others, have operated successfully for many decades.

BUILDING THE PLATFORM

Dec 2025
LOI with Alkeemia for toll purification

Feb–Apr 2026
Purification testwork exceeds targets

Mar 2026
MOU with Alkeemia to establish a second production facility

May 2026
Binding AIG6 JV at Porto Marghera

Jun 2026
Commencement of construction at Collie

Nov 2026
Rebrand to IG6 Advanced Materials

RENEWING THE REGISTER AND STRENGTHENING COMMERCIAL PARTNERSHIPS

Placement
Completed August 2026

Supply & Demand in Key Markets

+200ktpa of demand in Asia-Pacific and Europe, for engineered and purified graphite

ersonal use only

ASIA-PACIFIC · SUPPLIED FROM COLLIE, WA

90%+
of Japan's and South Korea's graphite imports come from China

6–9 months
order to delivery from China, incl. 3–6 month export licence

~2–3 weeks
Fremantle to North Asia by sea

EUROPE · SUPPLIED FROM PORTO MARGHERA, ITALY

~97%
of the EU's natural graphite is imported

6–9 months
order to delivery from China, incl. 3–6 month export licence

1–3 days
Porto Marghera to customers in Germany, the UK and Italy

STRONG DEMAND FOR EX-CHINA, PURIFIED SUPPLY

Advanced Discussions with Major Asian Groups

Customers across North Asia are seeking purified graphite supply outside China. IG6 is in advanced discussions with major Japanese industrial groups and trading houses for product from Collie.

A CONCENTRATED MARKET, SHORT OF PURIFIED SUPPLY

Porto Marghera Fills the Purification Gap

Asbury's acquisition of AMG Graphite leaves European supply concentrated in Asbury and SGL Carbon. Customers want ex-China, purified material, and Europe has no large commercial-scale purification.

Wogen: Our Strategic Partner

A global critical minerals trader securing concentrate supply for IG6

Global Critical Minerals Trader
Specialty metals and minerals, traded worldwide

Over 50 Years' Experience
An established counterparty to producers and end users

Global Sales Footprint
Technical sales reach into every key market

01

Concentrate Supply

Wogen supplies graphite concentrate for all IG6 projects, sourced from multiple producing mines outside China.

Binding

ersonal use only

CONSTRUCTION STATUS

- 0 LTIs
- Building ~40% complete, completion target March 2027
- Equipment install from Q2 2027
- Initial capacity – ~6,500t/y expanding to 10,000 t/y

OPERATIONS

- Feedstock supply agreement signed with Wogen to source graphite from multiple producing mines ex-China
- Concentrate received in Fremantle and trucked to Collie for processing
- Operations commence Q3 2027, with an 18-month ramp-up for seamless market entry
- Exported to Asia-Pacific and Europe from Fremantle

The Alkeemia / IG6 Joint Venture, Venice

A binding joint venture with access to purification, commissioning underway

HOW IT WORKS

- Alkeemia contributes land within its site and manages construction and operations under an Operations Management Agreement
- IG6 contributes graphite processing expertise and funds the capital for initial development
- Shared warehousing, control rooms, laboratories and utilities keep costs down

WITH ACCESS TO PURIFICATION

- Alkeemia is developing what would be Europe's only commercial scale graphite purification capacity at Porto Marghera
- Pilot plant commissioning underway using IG6-sourced graphite concentrates
- The JV will seek access to the future purification centre

DEC 2025

Letter of intent for toll purification

FEB–APR 2026

Purification testwork exceeds targets

Alkeemia: Our Fluorochemicals Partner

A European leader in fluorine chemistry, developing graphite purification at Porto Marghera

HF production, Porto Marghera

HF storage

Graphite R&D laboratories

WHO ALKEEMIA IS

Alkeemia is a European leader in fluorine chemistry and one of the continent's leading producers of hydrofluoric acid, operating the most advanced and modern HF site in Europe at Porto Marghera, Venice.

HF is a key reagent across critical minerals processing, from graphite purification to battery salts, semiconductor materials and specialty metals. Graphite is our first partnership; the same platform opens the door to others.

ALKEEMIA AT A GLANCE

- **110+ specialists**
  Including 13 PhDs
- **~€80M invested**
  HF platform upgrade and a new line
- **99-year site tenure**
  Permitted chemical site at the port
- **EU Strategic Project**

Springdale: Secure Upstream Supply

One of Australia's largest graphite resources, 100% owned, near Hopetoun, WA

OUR STRATEGY: PROCESSING FIRST

1 BUILD
Processing and customers
Collie and Porto Marghera establish products, qualification and offtake

2 GROW
Volume demand
A strong earnings base and customer demand at scale

3 INTEGRATE
Bring Springdale online
Upstream supply when demand supports it: vertical integration

MINERAL RESOURCE (JORC 2012)

Cut-off	Mt	TGC%	Contained Mt
2% TGC	49.3	6.5	3.2
5% TGC	**28.0**	**8.7**	**2.4**

SECURE SUPPLY OPTION

A secure Australian graphite supply chain for strategic customers and stakeholders, if required.

Leadership: Mine to Market

Leading Western graphite executives, backed by strategic industrial and financial partners

Phil Hearse
Chairman and Founder

Metallurgical engineer and founder of BatteryLimits; feasibility work for global majors and most Western graphite projects.

Andrew Worland
Managing Director and CEO

Mining executive with two decades in finance, corporate and marketing, including graphite sales and downstream markets.

Aidan Nania
Executive Director

Investment banker; former owner and director of Skaland Graphite, Norway's operating graphite mine.

David Pass
Technical Director

Metallurgist with 30 years in graphite processing; engineering and feasibility for global majors and ASX developers.

Liam Farley
Non-Executive Director

Founder and CEO of Xcelsior Capital, investment partner of Wogen.

MINE TO MARKET

Feasibility and engineering → Mine ownership and operations → Processing and purification → Sales and downstream

PARTNERS

Investment Highlights

IN PRODUCTION FROM 2027

~A$26M EBITDA by 2030

From two processing hubs supplying purified graphite to Western markets

12,750 to 19,000 t/y
high-spec graphite capacity

Q3 2027
first production at Collie

Policy Aligned

Fully aligned with Australian, Italian and EU critical minerals strategies

Global Scale

19,000 t/y with capital-efficient expansions: one of the largest listed producers of high-spec graphite worldwide

Earnings Building

Collie in construction, operating from Q3 2027; IG6 EBITDA scaling to ~A$26M by 2030

Purification Advantage

Purification at Porto Marghera through JV partner Alkeemia, a capability scarce outside China

Capital-Efficient Funding

Grant, agency and partner capital first: proven at Collie, now replicated in Italy

Upstream Optionality

Springdale, 100% owned: the most capital-efficient per tonne of production among undeveloped graphite projects

NEAR-TERM CATALYSTS

Oct 2026	Nov 2026	Q1 2027	Q3 2027	2028
Italy–WA critical minerals MOU at IMARC	Alkeemia purification pilot plant commissioning	Porto Marghera final investment decision	Collie operations commence	Porto Marghera first production

Timing indicative and subject to permits, funding and market conditions. EBITDA is an IG6 base-case model projection, not guidance.
